## EDUCATION

**Xavier University of Louisiana**                                                                    **New Orleans, LA**
*Bachelor of Science in Computer Science and Minor in Mathematics*                *August 2019 – May 2023*
- **GPA**: 3.48
- **Relevant Courses**: Introduction to Computer Science, Data Structures & Lab, Software Development, Operating Systems, Databases, Data Analytics, Design & Analysis of Algorithms

## WORK EXPERIENCE

**CotingaSoft**                                                                                                    **New Orleans, LA**
*Software Development Intern*                                                                          *June 2022 – July 2022*
- Collaborated with a cross-functional team to gather project requirements from clients, discuss UI design for multiple projects, and ensure alignment with client needs.
- Implemented agile practices under mentorship, accelerating software development.
- Upgraded client project libraries within package.json files via npm, using Docker for faster testing and deployment.
- Conducted thorough audits of client AWS resources for multiple projects, identifying cost-saving opportunities that improved system efficiency.

## PROJECTS

**Operating Systems Class**                                                                            **New Orleans, LA**
*NACHOS Multiprogramming Project ([Repository](#))*                                *August 2022 – December 2022*
- Modified an instructional uniprogramming operating system written in Java to allow multiprogramming, allowing it to execute several programs concurrently instead of one.

**Introduction to Text Mining Class**                                                            **New Orleans, LA**
*Text Summarizer ([Repository](#))*                                                            *August 2021– December 2021*
- Created a program in Google Colab using Python libraries such as Pandas, NumPy, and Natural Language Toolkit that shortens text based on word frequency.
- Simplifies reading long texts by omitting sentences unrelated to the main idea and reducing their length by up to 50%.

## SKILLS

- Java, Python, HTML, CSS, JavaScript, MySQL, Pandas, NumPy, Matplotlib, Natural Language Toolkit, Git, GitHub, Bitbucket, Jira, Docker, Visual Studio Code, Intellij IDEA, Google Colab

## ACTIVITIES / LEADERSHIP

**Xavier University of Louisiana**                                                                    **New Orleans, LA**
*Mathematics Tutor*                                                                                        *August 2019 – May 2020*

**New Orleans Military and Maritime Academy**                                        **New Orleans, LA**
*Cadet Second Lieutenant*                                                                              *August 2018 – May 2019*
